

*Secure Global Desktop*<sup>™</sup> ENTERPRISE EDITION

*An integrated secure  
application access solution*

*Secure Global Desktop*<sup>™</sup> ENTERPRISE EDITION is an integrated application management and access solution.

Secure Global Desktop Enterprise Edition software provides access to an unprecedented range of server-based applications, from a wide variety of platforms, with industry-leading security and scalability.

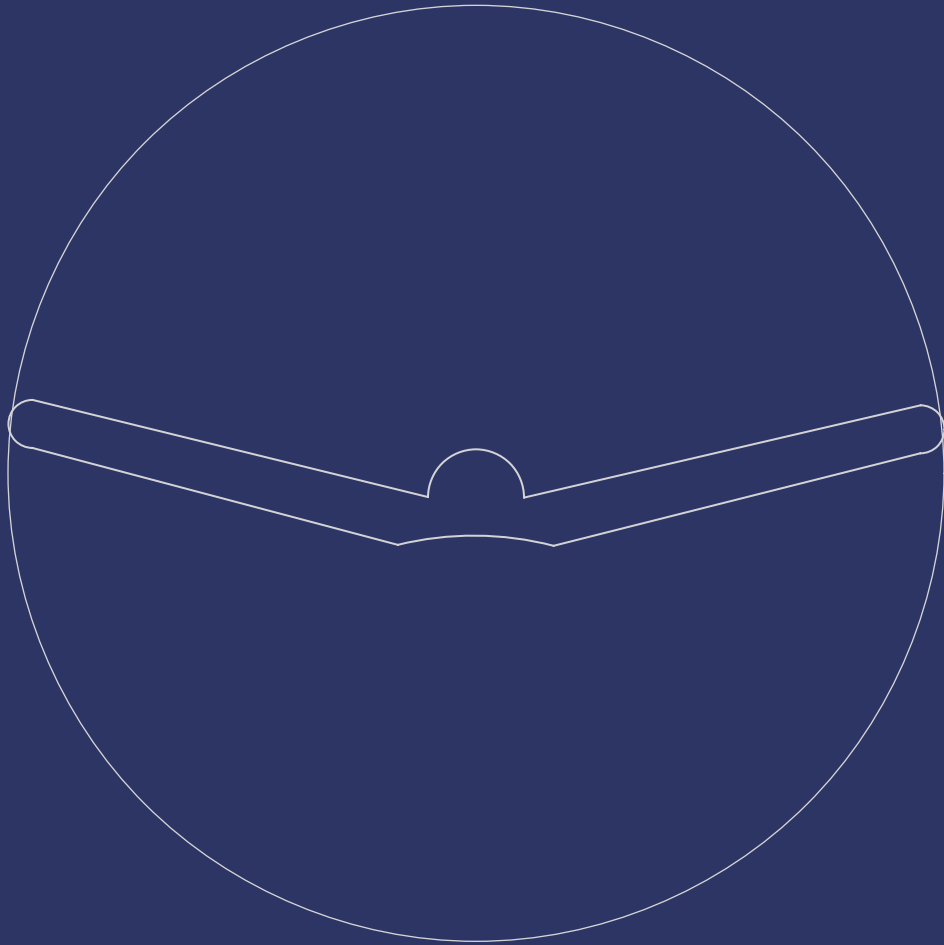

With a unique non-intrusive architecture that embraces open standards, Secure Global Desktop Enterprise Edition software offers seamless integration for the demanding enterprise. It delivers applications over the intranet, extranet, or Internet without touching the infrastructure or rewriting any code, giving new life to legacy applications and providing a means to migrate users across a variety of desktop or server platforms.

Thousands of organizations around the world in virtually every industry have successfully deployed Tarantella's access solutions as essential components in solving today's IT challenges, such as:

- Bridging diverse desktop, application, server and network environments
- Safeguarding corporate and private data to maintain security with confidence
- Ensuring business continuance, agility and resilience to unanticipated events

Secure Global Desktop Enterprise Edition allows you to:

- Provide access to centralized resources for mobile workers, branch offices and partners
- Provide optimized mobility for users with an office-like experience from any location
- Allow users on leading Java-enabled clients such as Windows<sup>®</sup>, Linux and Mac OS X<sup>®</sup> to securely access corporate applications and data
- Simplify migration between operating systems
